ON THE COVER Florence Lake Dam, owned by the Southern California Edison Company is part of its Big Creek-San Joaquin River Hydroelectric Project. This multiple-arch dam is 149 feet high with a crest length in excess of 3100 feet. The dam, constructed in 1926, is on the South Fork of the San Joaquin River in the Sierra National Forest, some 65 miles east of Fresno. The cover photo shows the downstream faces of a few of the buttresses that support the 58 arches of the dam; the spillway is in the foreground.

FOREWORD

Prior to August 14, 1929, State supervision over dams was exercised by either the State Engineer or the State Railroad Commission, but this supervision was limited in scope and extended to less than half of the dams in the State. Several federal offices exercised supervision to various degrees over debris dams and dams owned by the United States or occupying government rights of way. However, there still remained a large number of dams which had no form of supervision, either state or federal.

In 1928, the sudden failure of St. Francis Dam in Southern California resulted in a major disaster. Because of this failure and because of the potential hazard to the general populace from the many water storage projects in California, the Legislature in 1929 enacted legislation providing for supervision over non-federal dams in the State. This statute provided for (1) examination and approval or repair of dams completed prior to the effective date of the statute, August 14, 1929; (2) approval of plans and specifications, and supervision of construction of new dams, and of the enlargement, alteration, repair, or removal of existing dams; and (3) supervision over maintenance and operation of all dams of jurisdictional size.

Following the failure in 1963 of Baldwin Hills Dam, also in Southern California, the Water Code was amended by the Legislature to include within State jurisdiction both new and existing offstream storage facilities and entire reservoir basins of all non-federal dams. This amendment, which took effect on September 17, 1965, provided for both the approval of plans and specifications and construction supervision of all new offstream facilities and the examination and approval or repair of offstream dams and reservoirs completed before the effective date.

After the San Fernando earthquake of February 9, 1971, the Department considered extensively the subject of dam safety because of earthquake effects and postulated criteria on acceptable risks. The San Fernando earthquake, together with advances in the state of the art in dynamic analysis, resulted in reconsideration of the seismic safety of all hydraulic fill dams in California.

The statutes governing dam safety in California, Division 3 of the Water Code, place the safety of non-federal dams and reservoirs under the jurisdiction of the Department of Water Resources' Division of Safety of Dams. In administering the Dam Safety Act, the Department must comply with provisions of the California Environmental Quality Act of 1970. In compliance with that Act, all formal approval and revocation actions must be preceded by appropriate environmental documentation.

The Division of Safety of Dams reviews plans and specifications for constructing new dams or for repairing, altering, enlarging, or removing existing dams, and must grant written approval before the owner can proceed. Professional engineers from the Division evaluate the safety of each project, investigate proposed sites, and check available construction materials. During construction, they identify conditions disclosed during site development which may require design changes; they check for compliance with approved plans and specifications; and they approve all foundations before foundation material is placed.

The Department of Water Resources must have issued a certificate of approval based upon the findings of its personnel, before water can be impounded behind a new dam or behind an existing dam which has been enlarged, altered, or repaired. These certificates may contain restrictive conditions and may be amended or revoked.

Operating dams are periodically examined to detect unusual performance which, if not remedied, could lead to hazardous conditions.

Several years ago the Division's program was expanded to include review of major federal projects where there is high public interest, such as Warm Springs Dam, New Melones Dam, San Luis Dam, and the proposed Auburn Dam. The Division meets periodically with the engineering staff of federal agencies to exchange information for the mutual benefit of all concerned with building and monitoring safe dams.

The Division also conducted the "National Program of Inspection of Non-Federal Dams" for dams in California. The program was authorized by the National Dam Inspection Act and was implemented under the supervision of the U. S. Army Corps of Engineers. Work began on this program in May 1978, and contract work was completed on September 30, 1981, with reports for 120 dams transmitted to the Corps.

Information in this bulletin relating to dams under State jurisdiction was obtained from applications and plans submitted by owners and from surveys and supplementary information acquired during inspections and special studies. Some information on Federal dams and reservoirs within California, which are not subject to State jurisdiction, is also included in this bulletin.

The Department welcomes suggestions for additions and improvements from users of the Bulletin 17 series. Comments may be addressed to the Division of Safety of Dams, Department of Water Resources, P. O. Box 388, Sacramento, CA 95802.

PROVISIONS OF DIVISION 3 OF THE CALIFORNIA WATER CODE
AFFECTING JURISDICTION OVER DAMS AND RESERVOIRS

*Metric units not specified in the Water Code are:

1.83 metres = 6 feet	18.50 cubic dekametres = 15 acre-feet
7.62 metres = 25 feet	61.68 cubic dekametres = 50 acre-feet

EXPLANATION OF TABULATED DATA

This bulletin includes the name of dam, ownership, county, stream, location, type, size, water storage capacity, and age of each dam under jurisdiction of the State of California. All units of measure are given in the English System and the International System. Column headings introduce the data as indicated below. Abbreviations are used where necessary because of space constraints.

Name of Dam as assigned by owner on application.

Dam Number as assigned by the Department of Water Resources.

Name of Owner as it appears on application.

Parapet Code/Height as measured above the dam crest in feet. If a parapet exists it is either (1) a structural wall adequate to impound water, or (2) a wall not capable of storing water. If parapet code is 1, the dam crest is the top of the parapet wall.

County in which dam is located.

Stream on which dam is located as named by the owner on original application or as revised to conform with USGS topographic maps.

Location is section, township, range, and base line and meridian, as used in "The System of Rectangular Surveys". Also included are latitude and longitude of the center point of the dam.

Type of main dam only.

Unit for dimensions of each item, first in the English System, then in the equivalent unit in SI (metric).

Storage Capacity in acre-feet and decametres, including dead storage.

Drainage Area in square miles and in square kilometres.

Reservoir Area in acres and hectares at spillway crest elevation or, at a higher maximum water storage elevation if headworks controls are continuously used.

Crest Elevation in feet and metres (USGS datum, when available; otherwise, in approximate USGS datum).

Crest Length of the main dam (excluding auxiliary dams) in feet and metres.

Height in feet and metres from dam crest elevation to the lowest elevation of the outside limit of the dam.

Total Freeboard is the vertical distance in feet and metres from the dam crest to the lowest point of the spillway control section (excluding flashboards and gates).

EXPLANATION OF TABULATED DATA (Continued)

Operating Freeboard, where spillway crest controls are used, the vertical distance in feet and metres from the dam crest to the certified water storage elevation.

Crest Width in feet and metres to the normal axis at the narrowest point.

Dam Volume in cubic yards and cubic metres of the principal material used for both main and auxiliary dams.

Year Completed is date the original construction was completed.

CONVERSION FACTORS

Quantity	To Convert from Metric Unit	To Customary Unit	Multiply Metric Unit By	To Convert to Metric Unit Multiply Customary Unit By
Length	millimetres (mm)	inches (in)	0.03937	25.4
	centimetres (cm) for snow depth	inches (in)	0.3937	2.54
	metres (m)	feet (ft)	3.2808	0.3048
	kilometres (km)	miles (mi)	0.62139	1.6093
Area	square millimetres (mm ²)	square inches (in ²)	0.00155	645.16
	square metres (m ²)	square feet (ft ²)	10.764	0.092903
	hectares (ha)	acres (ac)	2.4710	0.40469
	square kilometres (km ²)	square miles (mi ²)	0.3861	2.590
Volume	litres (L)	gallons (gal)	0.26417	3.7854
	megalitres	million gallons (10 ⁶ gal)	0.26417	3.7854
	cubic metres (m ³)	cubic feet (ft ³)	35.315	0.028317
	cubic metres (m ³)	cubic yards (yd ³)	1.308	0.76455
	cubic dekametres (dam ³)	acre-feet (ac-ft)	0.8107	1.2335
Flow	cubic metres per second (m ³ /s)	cubic feet per second (ft ³ /s)	35.315	0.028317
	litres per minute (L/min)	gallons per minute (gal/min)	0.26417	3.7854
	litres per day (L/day)	gallons per day (gal/day)	0.26417	3.7854
	megalitres per day (ML/day)	million gallons per day (mgd)	0.26417	3.7854
	cubic dekametres per day (dam ³ /day)	acre-feet per day (ac-ft/day)	0.8107	1.2335
Mass	kilograms (kg)	pounds (lb)	2.2046	0.45359
	megagrams (Mg)	tons (short, 2,000 lb)	1.1023	0.90718
Velocity	metres per second (m/s)	feet per second (ft/s)	3.2808	0.3048
Power	kilowatts (kW)	horsepower (hp)	1.3405	0.746
Pressure	kilopascals (kPa)	pounds per square inch (psi)	0.14505	6.8948
	kilopascals (kPa)	feet head of water	0.33456	2.989
Specific Capacity	litres per minute per metre drawdown	gallons per minute per foot drawdown	0.08052	12.419
Concentration	milligrams per litre (mg/L)	parts per million (ppm)	1.0	1.0
Electrical Conductivity	microsiemens per centimetre (uS/cm)	micromhos per centimetre	1.0	1.0
Temperature	degrees Celsius (°C)	degrees Fahrenheit (°F)	(1.8 × °C) + 32	(°F - 32)/1.8
